

HUNG-CHIA CHEN, Ph.D.

INFORMATION TECHNOLOGY & AI ARCHITECT // ADVANCED ENTERPRISE SYSTEMS

Current Academic Appointment: Adjunct Assistant Professor, Dept. of Information & Finance Management, National Taipei University of Technology (NTUT)

Highest Degree: Ph.D. in Management (Information Management Concentration), National Taipei University of Technology

Official Email: hongga.chen@ntut.edu.tw | **Location:** Taipei, Taiwan | **Website:** <https://hongga0812.github.io/profile/>

Executive Profile: Ph.D. in Information Management specializing in Enterprise Generative AI, RAG Knowledge Pipelines, and Business Intelligence. Former Project Director of national flagship digital transformation programs (e-Taiwan & m-Taiwan). Certified NVIDIA RAG LLM specialist with official Microsoft MCSE/MCSA and Cisco CCNA credentials.

1. Academic Credentials & Teaching Performance

Degree / Position	Institution / Organization	Key Achievements & Academic Milestones
Ph.D. in Management (Information Management)	National Taipei University of Technology	Doctoral Dissertation: Sustainable Development Models in Digital Media & Information Technology. Ranked 2nd University-wide in student teaching evaluations across entire faculty.
Adjunct Assistant Professor	Dept. of Information & Finance Management, NTUT	Instruction in Generative AI Systems, Business Intelligence, Enterprise ERP/CRM Architectures, Big Data Analytics, and FinTech Solutions.
Industry Project Director	Dept. of Industrial Technology & IDB, MOEA	Appointed Director & Principal Reviewer for National Innovative Network Applications and Next-Gen Digital Transition Projects.

2. Official Industry Certifications & Technical Accreditations

Category	Certification Title	Issuing Body / Technical Focus Area
Generative AI & LLMs	Building RAG Agents with LLMs	NVIDIA Deep Learning Institute (DLI) — Enterprise Vector DB & RAG
Business Intelligence	Google Analytics Individual Qualification (GAIQ)	Google — Advanced Consumer Analytics, Conversion & Big Data Insights
Systems Engineering	MCSE / MCSA Certified Systems Engineer	Microsoft — Enterprise Windows Server, Active Directory & Infrastructure
Networking & Routing	CCNA Certified Network Associate	Cisco Systems — Enterprise Routing, Switching & Network Architecture

3. National-Level Flagship Digital Infrastructure Initiatives

Program Name	Government Sponsor	Role & Engineering Deliverables
e-Taiwan National Initiative	Executive Yuan / Ministry of Economic Affairs	Principal Infrastructure Technical Architect. Designed large-scale high-availability network infrastructures and nationwide electronic public services.
m-Taiwan Mobile Initiative	National Science & Technology Council	Led wireless broadband network integration and smart telemedicine demonstration projects deployed across medical centers and public facilities.

4. Four-Layer Technology Evolution & Curriculum Roadmap

A systematic multi-tiered curriculum and architectural framework bridging foundational computing to executive AI strategy:

Curriculum Layer	Core Courses Taught (NTUT)	Applied Technologies & Methodologies
Level 04: Industrial Strategy Governance & Transformation	- Corporate Ethics & Sustainability (EMI) - Technology Management (MOT) - AI & Innovation Customer Relations (CRM)	Enterprise AI adoption roadmaps, ESG tech governance, and published deep learning frameworks in SSCI indexed journals.
Level 03: Generative AI Agent Pipelines & Media	- Generative AI & Multimedia Applications (EMI) - Practical Generative AI Lab - Digital Convergence & Audio Tech	NVIDIA RAG Agent pipelines, Vector Embeddings, semantic retrieval, prompt engineering, and multimodal audio-visual generation.
Level 02: Data Intelligence BI & Financial Analytics	- Business Intelligence (BI) - Big Data Analysis & Applications - Management Information Systems (MIS)	Power BI dashboards, Python data science pipelines, Google GAIQ analytics, predictive statistical modeling for consumer trends.
Level 01: Foundational Systems Database & Architecture	- Database Applications & SQL Design - Systems Analysis & Software Design - Introduction to Computer Science	Relational database schemas, network topology protocols (CCNA/MCSE), client-server infrastructures, and enterprise middleware.

5. Corporate Advisory Engagements & Research Output

Partner / Institution	Engagement Type	Delivered Solutions & Research Output
Industrial Technology Research Institute (ITRI)	Research Consultant	Consulted on industrial digital transformation, next-generation knowledge management architectures, and cross-domain technology incubation.
Enterprise BI & AI Advisory	Technical Advisor	Advised retail, telecommunications, and media groups on customer data platforms (CDP), automated reporting pipelines, and AI operational integration.
SSCI International Publication (Sustainability, IF=3.9)	Lead Author / Researcher	Published foundational research exploring deep learning algorithmic structures applied to audio signal processing and technology sustainability.
